The building planned by this conceptual solution represents a detached multi-apartment building.

The purpose of the building is exclusively residential, with 6 (six) residential units, two residential units are located on the ground floor, two are located on the first floor and two on the second floor of the building.

During the design, care was taken to ensure that the building was in harmony with the existing neighboring construction and that the layout of the residential units was functional and that the building corresponded to a modern way of life. Also, the location of the building is carefully defined so that each residential unit has maximum privacy and rational use of the outdoor space.

The ground floor of the building thus consists of an entrance, front area, elevator and staircase and two smaller apartments with a garden.

The apartments on the ground floor have a smaller square footage and their layout is simple and functional, consisting of an entrance, a hallway leading to a living room with a kitchen and an exit to the garden, a bedroom and a bathroom.

The apartments on the 1st and 2nd floor are sli...
